

ALUMINIUM RAINWATER SYSTEMS

## CASE STUDY

BLYTH ROAD,  
HAYES

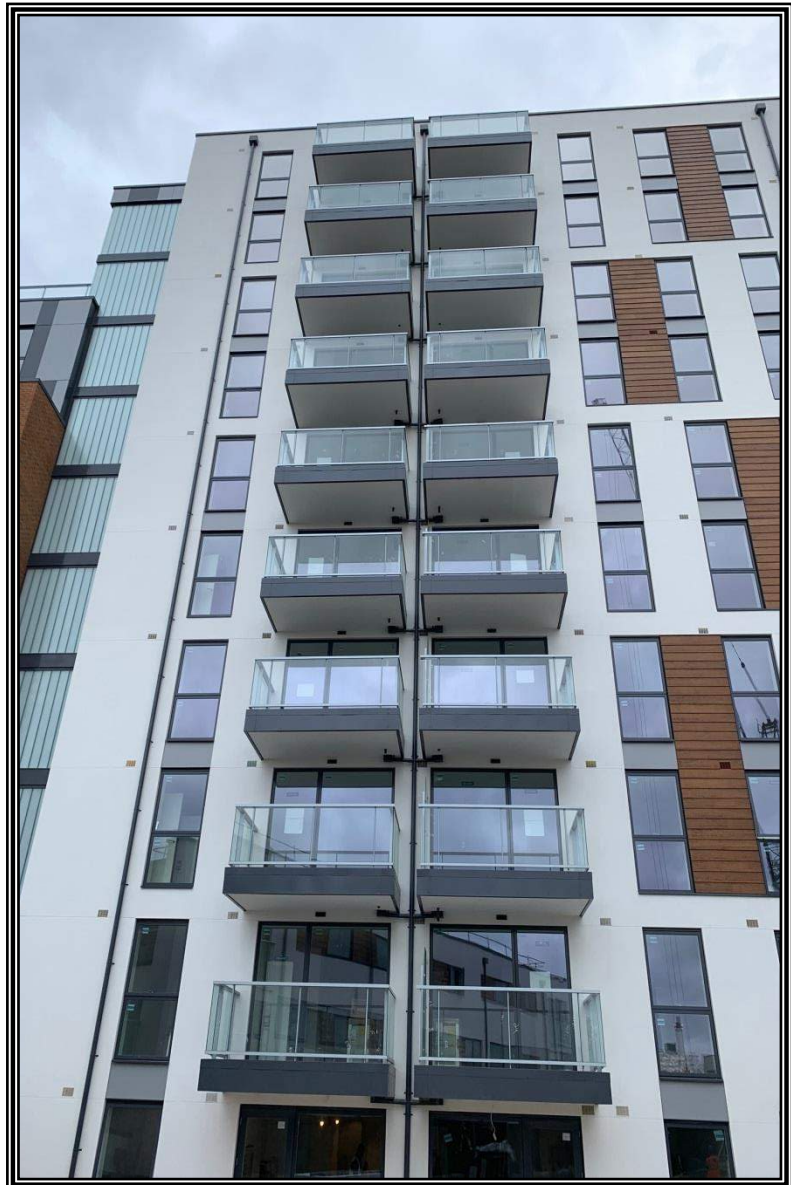

*At Stormguard Rainwater we were asked to supply the aluminium rainwater pipes to drain the flat roofs, terraces and balconies to this project at Blyth Road in Hayes. The balcony outlets that had been installed by a previous main contractor were oversized so a standard connection was unachievable. Mini hopper heads were manufactured to pick up the balcony outlets and take the rainwater away. The installation of the rainwater pipes completed a stunning looking development.*

*To assist our customer with this project Stormguard Rainwater offered on site assistance at survey stage to make sure all the components needed to complete the works were accounted for, as well as supplying working drawings to the client for approval, and to aid the installation once the materials had arrived on site.*

### SPECIFICATION:

**Downpipe:** 102mm Diameter Swaged

**Colour:** RAL 7015
