

CASE STUDY

NORWOOD

At Stormguard Rainwater we were asked to provide a coping system to the three blocks to this development in Norwood. Different coping widths with specific RAL colours were required to close off the parapets to the roof areas. To assist our customer with this project Stormguard Rainwater offered on site assistance at survey stage to make sure all the components needed to complete the works were accounted for, as well as supplying working drawings to the client for approval, and to aid the installation once the materials had arrived on site.
