

ALUMINIUM RAINWATER SYSTEMS

CASE STUDY

SPRINGFIELD LANE,
BROADWAY

At Stormguard Aluminium Rainwater Systems Ltd we manufacture and supply a complete range of gravity rainwater profiles. For this project the customer wanted a clean and striking finish to complement their crisp white rendered façade. They chose our direct-fix box gutter for its sleek and modern design with no visible fixings to detract from the unbroken line of the gutter. This aesthetically pleasing profile is enhanced further through the installation of our rectangular section downpipe which keeps the square edge illusion perfectly both vertically as well as horizontally.

To assist our customer with this project Stormguard Rainwater offered on site assistance at survey stage to make sure all the components needed to complete the works were accounted for, as well as supplying working drawings to the client for approval, and to aid the installation once the materials had arrived on site.

SPECIFICATION:

Gutter: 175 x 100mm Box Fast-Fit – Direct Fix

Downpipe: 102 x 76mm Rectangular

Colour: RAL 7016 – Matt Finish
