

ALUMINIUM RAINWATER SYSTEMS

CASE STUDY

BEECHWOOD,
BASILDON

At Stormguard Rainwater we were asked to provide a coping system which would be both robust and aesthetically pleasing to close off the parapets at roof level. Stormguard manufacture all variants of roof copings and for this project the obvious choice was our secret fix 'snap fit' system. This system is quick and easy to install and there are no visible fixings once the product is fitted, resulting in clean straight lines running around the top of the building.

To assist our customer with this project Stormguard Rainwater offered on site assistance at survey stage to make sure all the areas which needed parapet copings were checked and measured, as well as supplying working drawings to aid the installation once the materials had arrived on site.

SPECIFICATION:

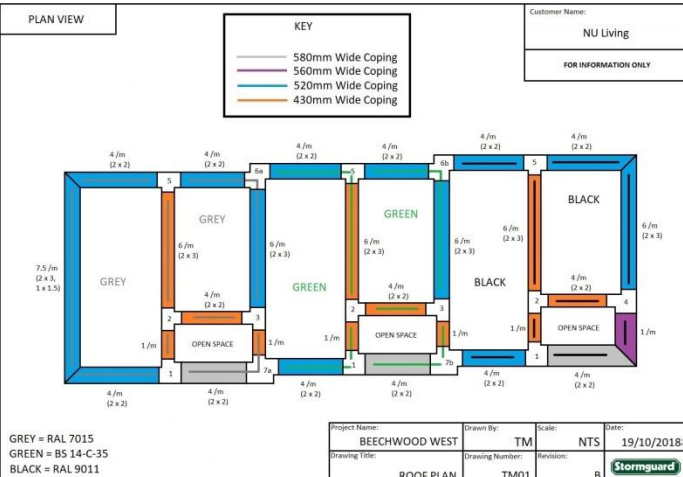

Size: Coping size dependant on wall width.

Style: Secret Fix (snap system).

Colour: Multiple RAL & BS colours.
