

ALUMINIUM RAINWATER SYSTEMS

## CASE STUDY

LUTTRELL ROAD,  
SUTTON COLDFIELD

Luttrell Homes contacted Stormguard Rainwater with a view to acquiring a rainwater system which had a traditional cast profile, but with sleek, clean, attractive lines for its latest executive development. Our light-weight moulded ogee gutter fitted the requirements perfectly given its fast-fit, fixing free, clip system which can be direct fixed, negating the need for fascia brackets. Along with the cast eared collar rainwater pipes, and our 'cast-a-like' textured finish, the completed rainwater system bridged the gap between traditional and contemporary perfectly, and put the finishing touches on a stunning new build property.

To assist Luttrell Homes with this project Stormguard Rainwater offered on site assistance at survey stage to make sure all the components needed to complete the works were accounted for, as well as supplying working drawings to the client for approval, and to aid the installation once the materials had arrived on site.

### SPECIFICATION:

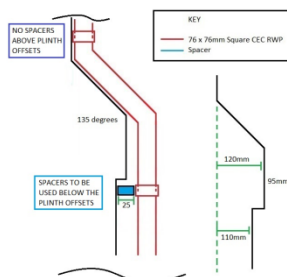

**Gutter:** 125 x 100mm Ogee Fast-Fit – Direct Fix

**Downpipe:** 76 x 76mm Square Cast Eared Collar

**Colour:** Textured Black Matt
